

How many more children are we willing to let inhale poison?

PM_{2.5} particulate emissions are believed to be harmful. A recent study found very high levels on the Tube system. The report is at <https://www.sciencedirect.com/science/article/pii/S0160412019313649>

Khan says this is so dangerous he must force ULEZ on us

“A number of the Mayor’s policy targets mean journeys must shift away from private car use towards more active travel and public transport.”

- yet it’s ok if we travel in this!!!

Current UK limit for PM_{2.5} is **20 µg /m³** decreasing to **10** by 2040. WHO new limit is 5 µg /m³ (micrograms per cubic metre)

Outer London roads currently about **10 µg /m³**

Underground network Average **88 µg /m³** of PM_{2.5}

30 Stations have **> 250 µg /m³** of PM_{2.5}
